

What is trackso solar?

TrackSo Solar is a cloud based energy management IoT platform to track your solar PV system's performance, identify anomalies and provide immediate support, giving you a full control over your system without actually being present there.

What is trackso & IoT & energy management?

Trackso simplifies the way you operate and maintain your assets. IoT & Energy Management A cloud-based IoT platform to enable you to monitor, operate and maintain your energy systems remotely, giving you full power to optimize system performance and minimize maintenance costs. If playback doesn't begin shortly, try restarting your device.

What is trackso & how does it work?

Be the first to get notified of New Products, Services and Platform Updates. TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business outcomes. Product is live since 2017.

How does trackso monitor a solar thermal system?

TrackSo provides performance based monitoring for Solar Thermal Systems. How do we collect data of a Solar Thermal System? A temperature probe is attached to : Controller is connected to monitor the pump.

TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business outcomes. Product is live since 2017.

TrackSo Solar Monitoring; Weather Stations; Solar Water Pumps; Zero Export; Solar- DG Sync; Select Page. Job Openings. Filter by. All Job Category. All Job Type. All Job Location. Accounts Executive @ TrackSo : Delhi. Accounts. Janakpuri New Delhi Vikaspuri. More Details . Recent Posts. TrackSo's instant email alerts saved INR 7 Lakhs in ...

TrackSo API makes it easy for business users to build custom applications & integrate monitoring data with existing business tools. ... Use Cases. Create white-labelled Solar / Energy management solutions (mobile/web) Mobile Application for end-customers; Integrate with existing business tools (ex: Google Spreadsheet, CRM, ERP)

TrackSo's instant email alerts saved INR 7 Lakhs in generation loss! Want to synchronize DGs on different bus bars with your Solar plant? Forget cable laying..Go wireless! Need a centralized portal for all your solar plants & multi-brand inverters? Avoid unnecessary site visits!

TrackSo Solar Monitoring; Weather Stations; Solar Water Pumps; Zero Export; Solar- DG Sync; Select Page. solar inverter. solar inverter. ... TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business ...

With over a 2000 solar PV systems being monitored on our cloud IoT platform TrackSo, there is crucial information and learning that we've derived from understanding those systems. We've identified ways to minimise losses in energy production, enhance maintenance activities with informed decision making and optimise overall O& M cost saving ...

TrackSo runs on the same infrastructure that Google uses internally for its end-user products, such as Google Search and . All data is encrypted in transit between Google, the customers, and the data centers. The data stored on persistent disks is encrypted under 256-bit AES and each encryption key is also encrypted with a set of regularly changed master keys.

Site Generation Analysis. Daily Energy - Energy of the plant for the current day.; Total Energy - Lifetime energy of the plant.; Output Active Power - Instantaneous power of the plant.; Specific Yield for the Day- Energy generated per kWp installed.; CUF for the Day : Capacity utilisation factor is the actual output from a solar plant to the maximum possible ...

So, bid farewell to the complexities of managing dispersed solar installations and embrace the simplicity and efficiency of TrackSo's Centralised Portal. If you found this blog helpful and would like to know more, reach out to us through our mail at sales@trackso , or call us at +91-8800606858.

Learn and get started with the TrackSo for monitoring of your solar power systems ... TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business outcomes. Product is live since 2017.

The section explains how to complete sign up on TrackSo and create an account to monitor your Solar Power Plant. Following are the steps: Go to the TrackSo User Sign-Up Page or If you have received a Invitation email, click on Accept Request.; Enter your email and set your password.

We can monitor various points throughout a large solar loop, monitoring collector, tank, pipe temperature, as well as ambient temperatures, enabling quick and easy monitoring and troubleshooting. How it works?

TrackSo Solar Monitoring; Weather Stations; Solar Water Pumps; Zero Export; Solar- DG Sync; Job Openings; Select Page. Wattmon Device Remote Access. Note ... TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. ...

Imagine you're at your office and suddenly realize that your monitoring device at a remote site isn't working properly. Your client is asking for a fix, but the only solution is to send someone to the site to figure out the

problem.

TrackSo is a data monitoring and data analytics platform for solar PV plants. It helps in tracking performance, spotting or predicting failures and providing information about appropriate O& M...

A WMS is one of the key components in a solar power plant. It's function is to gather the data of weather parameters such as solar radiation, Module surface temperature, Ambient temperature, wind speed etc. at any solar pv site which helps to monitor the efficiency and performance of the power plant. ... TrackSo is an IoT based SaaS product ...
