

What is a floating solar PV system in Tuvalu?

From solar rooftops and the Off-grid solar-powered Capacitive Deionisation (CDI) systems to the pioneering floating solar PV with 100kW. innovative solutions like floating solar panels (a first for the PICs) and raised solar installations are being embraced in Tuvalu as the Pacific grapples with addressing the challenge of limited land space.

Why should you choose Immergas solar?

designed to create integrated systems more easily and to grant energy, financial savings. Thanks to the completeness of the Immergas solar range, it is now easy for designers and installers to offer systems that use renewable sources that save energy and reduce running costs with innovative solutions for every kind of home.

How can Tuvalu improve its energy security?

to enhance Tuvalu's energy security by reducing its dependence on imported fuel for power generation and by improving the efficiency and sustainability of its electricity system.

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the E8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What was the first large scale solar system in Tuvalu?

The first large scale system in Tuvalu was a 40 kW solar panel installation on the roof of Tuvalu Sports Ground. This grid-connected 40 kW solar system was established in 2008 by the E8 and Japan Government through Kansai Electric Company (Japan) and contributes 1% of electricity production on Funafuti.

What are Immergas hybrid systems?

Immergas hybrid systems are hydraulically and electrically ready to be combined with heat pumps and solar heating systems\*. They require limited space and make possible to create effective solutions both in small and large homes\*. Immergas hybrid systems, for heating, cooling and hot water, are the advanced solution for making the most of renewable energy sources.
