

Who are the best solar energy companies in Finland?

Alternative Solutions Finland Oy: Solar thermal systems and components, retail. Areva Solar Oy: Turn-key solutions for solar energy. Financing options for large plants. Aura Energia: Holistic energy service provider in Turku area of Finland. Aurinkoinsinöörit Oy: ST and PV-systems design, import of SMA products, turn key projects.

What is solar energy used for in Finland?

Solar energy in Finland is used primarily for water heating and by the use of photovoltaics to generate electricity. As a northern country, summer days are long and winter days are short. Above the Arctic Circle, the sun does not rise some days in winter, and does not set some days in the summer.

Why should you choose solar Finland?

Solar Finland and its subsidiaries with strong long-term background are experts in all aspects of solar energy. Our extensive know-how and experience of over 40 years make it possible to develop in different areas making our products and services competitive in the solar energy markets both domestically and abroad.

How much solar energy will Finland produce by 2050?

LUT has modeled an emission-free energy system and demonstrated that the share of solar energy in Finnish energy production should rise to 10 percent by 2050. That would mean a leap from the current 635 megawatts to 35 000. The rooftop potential of all Finnish buildings (residential, administrative, industrial) is about 34 000 megawatts.

Will Helsinki become Finland's top city solar energy producer?

Helsinki has long dominated the position of being Finland's top city solar energy producer. However, it appears this will soon come to an end. Oulu city plans on installing a solar plant with an output of 420 kilowatts topping the Kivikko solar plant.

Can solar power improve the profitability of buildings in Finland?

LUT University has investigated how the profitability of solar electricity could be improved in different types of buildings in Finland. Researchers have debunked myths related to the orientation and dimensioning of solar photovoltaic systems and sales of surplus electricity.
