

To date, EnSights has provided an AI-driven, cloud-based centralised monitoring and asset management platform for renewable energy installations and portfolios ranging in scale from residential to commercial & industrial (C& I) and utility-scale. ... EnSights can also onboard BESS projects to its asset management, monitoring and control platform ...

The BESS aims to energise in early 2026 after SSE made a final investment decision on the project in November 2023. Image: SSE. The renewable energy arm of utility SSE has begun construction of a 320MW/640MWh battery energy storage system (BESS) in North Yorkshire. When completed, it will be one of the UK's largest BESS.

The new BESS asset is the second to be approved for the site. The organisation is already constructing a 100MW/200MWh BESS, which aims to provide further stability and facilitate the increasing number of variable renewable energy technologies being connected.. Commenting on this, Russell Slaughter, head of project development at Alinta Energy, said the ...

In a July letter celebrating the 25th anniversary of Moroccan King Mohammed VI's coronation, French President Emmanuel Macron announced a change in France's policy regarding the long-running Western Sahara dispute, declaring that "the present and future of Western Sahara lie within the framework of Moroccan sovereignty." That followed similar ...

All three systems include the Pixii Gateway controller, providing advanced monitoring and control applications as well as wireless communication and interoperability. The systems' functions can be executed autonomously or ...

Vertiv's BESS solution is optimized for mission-critical facilities. Our full-featured PCS--fast acting in 2ms--and the latest li-ion batteries, supports your sustainability goals and improves uptime. ... Monitoring & Management Digital Infrastructure Solutions Embedded Device Management Serial Console IP KVM Switches High Performance KVM LCD ...

The seven-year tolling agreement is for the 100MW/330MWh Bramley BESS currently under construction in Hampshire. Image: BW ESS. BW ESS and its partner Penso Power have signed the first long-term tolling agreement for a single battery energy storage system (BESS) asset in Great Britain with Shell Energy Europe.

All are based on real-life BESS projects with sizes between 20MW and 200MWh. Insights are anonymised and modified to respect the confidentiality of ACCURE's customers. 1. Battery cell quality . Battery cells are the heart of a BESS; their quality makes or breaks a system's ability to provide value. But high battery quality is not a given.

The 300MWh BESS will be Egypt's "first" utility-scale asset, the company claims. Image: AMEA Power. UAE-based renewable energy developer AMEA Power is set to build one of Africa's largest ...

It will connect to a new substation from transmission system operator (TSO) Western Power. Neoen said that once both phases of construction are complete, the Collie BESS will be able to cover 20% of the average demand on the SWIS grid. The two phases together total 560MW/2,240MWh of BESS capacity, making it among the largest projects in the world.

The standalone BESS will support grid stability and also do wholesale energy trading. The project has a contract with Italian transmission system operator (TSO) Terna to provide the Fast Reserve ancillary service for 1,000 annual operation hours, following a tender run by the TSO. The remaining capacity will be used for energy arbitrage.

The location of the BESS. Image: RWE. Germany-headquartered utility and independent power producer (IPP) RWE will build a 7.5MW/11MWh battery energy storage system (BESS) in the Netherlands with grid-forming inertia capabilities.

Using Drones for BESS Maintenance: Utilizing drones for real-time monitoring and maintenance of remote BESS installations boosts operational efficiency and safety. Although BESS requires minimal maintenance, ...

Firm Power, a BESS developer, has 21 grid-scale projects currently in development across Australia, comprising 2.3GW of capacity in New South Wales, 2.7GW in Queensland, 500MW in Western Australia ...

The latter is also overseeing a 150MW BESS co-located with a 373MW solar park that is the largest consented development in the UK. The nation will also host a Root-Power-owned BESS in Glamorgan, for which the BESS developer submitted a planning application alongside a UK-wide package totalling 315MW. The company currently has a 2GW BESS ...

The first Capacity Investment Scheme (CIS) tender round in Australia successfully awarded 3.5GWh of co-located battery energy storage systems (BESS) as renewables-plus-storage projects. Sungrow, CREC ink ...
