

Belgium has a long-term energy and climate strategy in place to meet EU's carbon-neutrality target by 2050. Energy storage projects in Belgium and the surrounding ... This project is Wärtsilä's first in Belgium and one of the largest systems in the country to-date. The 25 MW / 100

"We are also looking at Italy and Spain. But the upcoming energy storage tender in Italy could potentially be undersubscribed as the systems will be offered 10-year offtake contracts for 95% of their capacity leaving little room for making revenues elsewhere," says Andy Tang, VP of energy storage at Wärtsilä ES& O.

Wärtsilä has been awarded five power plant projects, which will support development of the national grid in Argentina. Contracts for three power plants, totalling EUR 78 million, have been signed with Industrias J.F.Secco S.A. (Secco) and are included in Wärtsilä's order book for the second quarter of 2016.

Wärtsilä will deliver a full EPC (Engineering, Procurement & Construction) project. In addition to the EPC contract, a 5-year operation and maintenance management agreement and a 10-year spare parts supply agreement have also been signed. The power plant includes ten 18-cylinder Wärtsilä 50DF dual-fuel engines and a steam turbine.

A power plant of this size using Wärtsilä combustion engines is a landmark power generation installation. It represents recognition of the superior efficiency possible with Wärtsilä's technology. Furthermore, the tri-fuel capability provides unmatched flexibility, and ensures that Jordan will have a safe and reliable energy supply.

Wärtsilä has announced its plans to supply a power plant extension to AngloGold Ashanti's gold mine in Siguiri, Guinea. ... Wärtsilä Energy Solutions West Africa regional director Arnaud Gouet said: "This is a significant proof of confidence ...

Wärtsilä will supply its GridSolve Quantum BESS equipment (pictured) as well as engineering services to Colbun in Chile. Image: Wärtsilä. Energy technology company Wärtsilä has announced battery energy storage system (BESS) projects in two new markets for the company, with orders from customers in Chile and Belgium.

Wärtsilä Energy Storage & Optimisation. Energy storage integrator: optimising energy for a smarter, safer, more reliable grid. Wärtsilä Energy Storage & Optimisation is leading the introduction of disruptive, game-changing products and technologies to the global power industry. As a battery energy storage integrator, we're unlocking the way to an optimised energy future ...

Wärtsilä Corporation has won a contract in November to supply the Belgian company Renogen SA with a biomass-fuelled combined heat and power plant for installation in the municipality of Amel in the Ardennes area of Belgium. The new plant will have a net electrical power output of 3.29 MWe, and a thermal output of 10 MWth for district heating.

About Wärtsilä: Wärtsilä is a global leader in innovative technologies and lifecycle solutions for the marine and energy markets. We emphasise innovation in sustainable technology and services to help our customers continuously improve their environmental and economic performance.

Wärtsilä has signed a Memorandum of Understanding (MoU) with the French multinational energy company ENGIE, to develop solutions and services within the small scale LNG business sector. The cooperation covers four work streams: LNG for ships, LNG distribution in islands and remote areas, LNG to Power solutions, and small scale LNG and bio ...

Wärtsilä Energy Solutions Europe vice president Melle Kruisdijk said: "We are very pleased to be cooperating with Energetus and EDA on this important extension project. "The new capacity is much-needed and the Wärtsilä 32 ...

Wärtsilä is supplying a 22.7MW smart power generation plant to Cooperative Energy, which is an electric company based in Hattiesburg, Mississippi, US. The installation will be done under a full Engineering, Procurement and Construction (EPC) contract. ... Wärtsilä Energy Solutions US and Canada regional director Mikael Backman stated ...

Wärtsilä leads the transition towards a 100% renewable energy future. We provide flexible cutting-edge solutions and services to manage and optimise complex energy systems. Through power system modelling expertise we help our customers on their decarbonisation journeys by providing reliable, cost optimal and future-proof technologies.

The plant will contribute to Indonesia's growing energy demand allowing many domestic companies to become globally competitive. The availability of reliable, flexible and cost-efficient source of energy, will help their production and ...

Wärtsilä is entering the Belgian market, building a 25MW energy storage system - one of the largest systems in the country. The system will be in place to mitigate fluctuations in the grid, maintain energy frequency ...
